PROFILE

Current Software Engineering student at Makerere University and a working DevSecOps engineer at AIBOS Uganda. I specialise in security engineering and automated workflows — securing CI/CD pipelines, infrastructure-as-code, and Kubernetes supply chains — and I ship production digital solutions fast, from USSD dispatch backends to cross-platform mobile apps. A team anchor who makes a build secure, scalable, and deployable.

EXPERIENCE

AIBOS Uganda

DevSecOps & Systems Engineer

Feb 2024 – Aug 2026

- Administer Linux server environments (Ubuntu/Debian), writing automated Bash scripts for system maintenance, cron automation, and service supervision
- Own CI/CD workflows on GitHub Actions with disciplined Git branching, cutting deploy times ~60% while integrating container vulnerability scans

Linux · Bash · Docker · Kubernetes · Git · GitHub Actions

IONATECH

Co-founder · ML & Systems Engineer

Feb 2023 – Present

- Co-founded IONATECH (ionatec.com) — developing applied ML, data analysis, and intelligent cloud systems for East African enterprises
- Develop LLM and agentic workflows using LangChain, LangGraph, and Model Context Protocol (MCP) with rigorous evaluation benchmarks

Python · NumPy · Pandas · scikit-learn · Docker · Linux

Sauti Health

Developer · Engineering Partner

2026 – Present

- Develop offline-first mobile workflows using Flutter and React Native with resilient sync and conflict resolution for low-bandwidth zones
- Package and deploy microservices with Docker containers for reproducible test and production environments

Python · Django/FastAPI · Linux · Docker · Flutter · React Native

Makerere University

Software Engineering Student

2022 – Expected Jan 2027

- Engineered Smart Discussion Forum — a collaborative academic platform built with Laravel, Livewire, and React components with Tailwind CSS
- Implemented predictive models and statistical analysis using Python (NumPy, Pandas, scikit-learn) on academic datasets

Python · Django · Flask · Laravel · React

EDUCATION

Bachelor of Science in Software Engineering

Makerere University

2022 – Expected Jan 2027 · CGPA 4.38

Bachelor of Science in Computer Engineering

Makerere University

2019 – 2023

National Diploma in Information Communication Technology

Uganda Technical College – Lira

2016 – 2018 · CGPA 4.77

TECHNICAL SKILLS

Security Engineering

Trivy, Cosign, Sigstore / SLSA, OPA, Vault, RBAC, SBOM

Automated Workflows

GitHub Actions, Terraform, ArgoCD, Kubernetes, Docker, CI/CD

Rapid Prototyping

FastAPI, Next.js, Flutter, React Native, Supabase, Firebase

Data & AI

Python, PostgreSQL, scikit-learn, LangChain, LangGraph, RAG

AVAILABILITY

Participation Eligibility

10–13 July 2026 · in person · Kampala

Eligible as a current student at Makerere University, and ready to anchor an assigned team of 3–6 with a demonstrable digital build.
